

ELECTRONIC BALLAST

Features

- Input Range 90V to 300V with 10 % variations
- Operate voltage at 120 V
- Input wattage 10-38 watt , depend on lamp used
- Operating temperature 0 to 40 degree
- Ballast has circuitry for thermal protection / power factor correction
- Less total harmonic distortion (TDH)
- No starter & booster required
- No humming
- Silent Operation
- No wall blackening
- Instant Flicker free start
- High efficiency - lower losses
- Work efficiently even on heavy voltage fluctuation
- Saves power upto 30% as compared to conventional choke (Free after working)
- Only 10 months for residential installation & only 4 months for commercial installation
- Much lighter in weight and compact design

**Saves Up to 55 UNITS
Per Tube in a Year**

**Input Range 90V to 300V. Saves Power
up to 30% Compact & Light Weight
No Starter & Booster Required**
