

Solar Water Heaters

Features

- Roof-mounted tank & collectors
- Thermosiphon system with natural convection circulation of hot water
- 200 & 300 Litre roof-mounted tank capacities
- Gas or Electric Boost Options
- Closed loop models available with 300 Litre tanks
- 2 x high efficiency flat plate thermal collectors
- Boost option electricity / eternity gas .
- No pipe blockage
- High Density compressed PUF insulation to store hot water
- Inner tank material high grade steel
- Saves electricity.
- Helps in preservation of the environment as it is a non-polluting source of energy.
- Capacity 100 ltr ,200 ltr
- Wattage 15-20 .
